

Transition from G-Series to ZD Series

Upgrade GX and GK Series printers to the new ZD621 and ZD421: prevent printing interruptions while gaining more features and benefits

More Flexibility

- Field-upgradeable media handling and connectivity options, including wireless
- Standard, Healthcare, RFID, Linerless, and Ribbon Cartridge model for instant ribbon loading
- Improved sensors to utilize virtually any media type

Cutting-edge Technology and Support

- Print quicker with faster print speeds
- Improved user interface, including color touch display*
- Battery and carry case for transportability
- Two-year standard warranty

Easy to Transition

- G-Series backwards compatibility allows you to use existing formats and supplies
- Emulations to easily replace non-Zebra printers
- More connectivity choices means more flexibility

Exclusive Print DNA Software

- Remote printer visibility and management
- Security tools to protect against cyberattacks
- Simplified pairing with mobile devices via NFC
- Ideal for Managed Print Services with printer and supplies usage visibility
